Energy performance certificate (EPC)

17, St. Michaels Mews Tividale OLDBURY B69 2JL

Valid until 12 January 2025

Certificate number

Energy rating

7908-2941-6280-7974-2984

Property type

Top-floor flat

Total floor area

31 square metres

Rules on letting this property

Properties can be rented if they have an energy rating from A to E.

If the property is rated F or G, it cannot be let, unless an exemption has been registered. You can read <u>guidance for landlords</u> <u>on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance)</u>.

Energy efficiency rating for this property

This property's current energy rating is D. It has the potential to be C.

See how to improve this property's energy performance.

Score	Energy rating	Current	Potential
92+	Α		
81-91	B		
69-80	С		72 c
55-68	D	56 D	
39-54	E		
21-38	F		
1-20	G		

The graph shows this property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

The average energy rating and score for a property in England and Wales are D (60).

Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

Feature	Description	Rating
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Wall	Cavity wall, filled cavity	Poor
Roof	Pitched, 270 mm loft insulation	Good
Window	Fully double glazed	Average
Main heating	Electric storage heaters	Average

3/4/2021

Energy performance certificate (EPC) - Find an energy certificate - GOV.UK

Feature	Description	Rating
Main heating control	Manual charge control	Poor
Hot water	Electric immersion, off-peak	Very poor
Lighting	No low energy lighting	Very poor
Floor	(another dwelling below)	N/A
Secondary heating	Room heaters, electric	N/A

Primary energy use

The primary energy use for this property per year is 629 kilowatt hours per square metre (kWh/m2).

What is primary energy use?

Environmental impact of this property

One of the biggest contributors to climate change is carbon dioxide (CO2). The energy used for heating, lighting and power in our homes produces over a quarter of the UK's CO2 emissions.

An average household produces

This property produces

3.3 tonnes of CO2

2.6 tonnes of CO2

6 tonnes of CO2

This property's potential production

By making the <u>recommended changes</u>, you could reduce this property's CO2 emissions by 0.7 tonnes per year. This will help to protect the environment.

Environmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how energy is consumed by the people living at the property.

How to improve this property's energy performance

Making any of the recommended changes will improve this property's energy efficiency.

Potential energy If you make all of the recommended changes, this will improve the property's energy rating and score from D (56) to C (72). rating What is an energy rating? **Recommendation 1: Cavity wall insulation** Cavity wall insulation Typical installation cost £500 - £1,500 Typical yearly saving £27 Potential rating after carrying out recommendation 1 57 | D **Recommendation 2: Hot water cylinder insulation** Add additional 80 mm jacket to hot water cylinder Typical installation cost £15 - £30 Typical yearly saving £19

Potential rating after carrying out recommendations 1 and 2

Recommendation 3: Draught proofing	
---	--

Draught proofing

Typical installation cost

£80 - £120

59 | D

Typical yearly saving

Potential rating after carrying out recommendations 1 to 3

Recommendation 4: Low energy lighting

Low energy lighting

Typical installation cost

Typical yearly saving

£20

62 | D

£25

Potential rating after carrying out recommendations 1 to 4

Recommendation 5: High heat retention storage heaters

High heat retention storage heaters

Typical installation cost

	£800 - £1,200
Typical yearly saving	
	£154

Potential rating after carrying out recommendations 1 to 5

Paying for energy improvements

Find energy grants and ways to save energy in your home. (https://www.gov.uk/improve-energy-efficiency)

Estimated energy use and potential savings

Estimated yearly energy cost for this property

£628

Potential saving

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

The estimated saving is based on making all of the recommendations in how to improve this property's energy performance.

For advice on how to reduce your energy bills visit Simple Energy Advice (https://www.simpleenergyadvice.org.uk/).

Heating use in this property

Heating a property usually makes up the majority of energy costs.

Estimated energy used to heat this property

Space heating

4213 kWh per year

Water heating

1630 kWh per year

Potential energy savings by installing insulation

Type of insulation

Amount of energy saved

Cavity wall insulation

340 kWh per year

You might be able to receive <u>Renewable Heat Incentive payments (https://www.gov.uk/domestic-renewable-heat-incentive)</u>. This will help to reduce carbon emissions by replacing your existing heating system with one that generates renewable heat. The estimated energy required for space and water heating will form the basis of the payments.

Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
